

Yashika Kashyap of Class VI A participated in an Art Contest hosted by Above: Space Development Corporation, an esteemed American aerospace company known for its groundbreaking work in space station development. Above: Space Development Corporation, formerly Orbital Assembly Corporation, is dedicated to advancing space exploration by developing and operating gravity-capable space stations both on-orbit and on the International Space Station (ISS).

Yashika's artwork has been selected to be integrated into a Falcon 9 rocket, which will be sent to the International Space Station. Her artwork will remain aboard the ISS for a duration of six months, a truly remarkable achievement for any budding artist.
