

Class 3 EVS Competition Results

'Young Messengers for the Environment'

In an endeavor to sensitise students and expose them to diverse environmental issues, the school organized an EVS competition for class 3 with the theme: **'Re-invent the way you live, Help the Earth live longer'** on **September 6, 2022**. The competition was held in two rounds.

For the first round, students were required to record a motivating message, appealing the audience for adopting healthy practices for sustainable living. Students took part with much enthusiasm and recorded their message in the form of a story, a speech, and role plays; using a backdrop, taking help of visual aids like flash cards, flip book, puppets, masks etc.

Based on their recordings, students were shortlisted from each section for the final round. They got a chance to speak before their fellow students and spread awareness about environmental issues like global warming, climate change, water shortage, rise in pollution, soil erosion, health and hygiene, use of natural resources and other related topics. They mentioned the cause, solution for the problem, their role along with the steps to be taken for future for the various environmental issues.

All the participants were encouraged by the presence of Junior School Coordinator Ms. Ankita Bahuguna. She guided the children about the significance of participating in school activities. The competition came to an end with everyone pledging to take an initiative of saving the environment and doing their bit for a cleaner and greener Mother Earth.
